Safety Data Sheet
According to Regulation (EC) No 1907/2006 (REACH)

Trade name: Glazed Porcelain Tile

SDS date: May 2018

SECTION 1: PRODUCT IDENTIFICATION

PRODUCT NAME: Glazed Porcelain Tile
SYNONYM: All current product references

CHEMICAL NAME: N/A
CHEMICAL FAMILY: N/A
CHEMICAL FORMULA: N/A

MANUFACTURER: Florida Tile
DIVISION: Corporate
ADDRESS: 1247 Alton Rd, Lawrenceburg, KY 40342
EMERGENCY PHONE: 859-219-5200

RECOMMENDED USE: Residential and Commercial Construction Applications
USE RESTRICTIONS: Refer to product installation manual

SECTION 2: Hazards Identification

IRRITANT/RESPIRATORY TRACT IRRITATION

IRritant/Respiratory tract irritation

Carcinogen

NOTES: Not applicable for intact tiles. Excessive exposure to tile dust can cause discomfort and mechanical irritation. Long term exposure to silica dusts can lead to silicosis.

EMERGENCY OVERVIEW:

The product is not classified as hazardous according to Regulation 1272/2008 (CLP). The product is a mixture of natural occurring minerals that have been mixed with water and fired in a high temperature kiln.

Signal Word (GHS-US): Danger
Hazard Statements (GHS-US): H335 - May cause respiratory irritation.
H350 - May cause cancer.
H372 - Causes damage to organs through prolonged or repeated exposure.

P501 - Dispose of contents/container in accordance with local, regional, national, and international regulations.
POTENTIAL HEALTH EFFECTS

EYES: Mechanical stress through eye rubbing if exposed to dust or airborne particulates

SKIN: Skin irritation if exposed to dust or airborne particulates

INGESTION: Potential choking hazard if exposed to airborne particulates

INHALATION: Mechanical stress from inhalation of dust or airborne particulates

ACUTE HEALTH HAZARDS: No further relevant information available.

CHRONIC HEALTH HAZARDS: No further relevant information available

CARCINOGENICITY
Crystalline Silica (Quartz)
LD50 Rat oral > 22,500 mg/kg & LD50 Mouse oral > 15,000 mg/kg LC50 Carp > 10,000 mg/l (per 72 hr)

OSHA: Recommended that Crystalline Silica be considered a POTENTIALLY OCCUPATIONAL CARCINOGEN. ACGIH: No information available

NTP: 9th Report: Lists Respirable Crystalline Silica as known to be a Human Carcinogen

IARC: Respirable Crystalline Silica is classified as a Group 1 Carcinogen (carcinogenic to humans).

SECTION 3. Composition/Information on Ingredients

INGREDIENT:
The product is a mixture of below natural occurring minerals that have been mixed with water and fired in high temperatures. It may contain <0.1 percent by weight each of the following elements: cadmium, zinc, chrome and other metals.

* Crystalline Silica exists in the nature of the minerals such as sand and clay

SECTION 4: First aid measures

Respiratory, hand and eye protection may be needed to prevent excess exposure to airborne particulates if dust is produced by cutting tiles or if dust is produced by any other operations, including removal.

EYES: Do not rub eyes to avoid possible cornea damage as a result of mechanical stress. Check for and remove any contact lenses. Rinse out with water with eyelids held wide open. Get medical attention if irritation persists.

SKIN: Wash off immediately with soap and plenty of water. Get medical attention if irritation persists.

INGESTION: Rinse out mouth and make victim drink plenty of water. Never give anything by mouth to an unconscious person. Do NOT induce vomiting unless directed to do so by medical personnel; call for medical help.

INHALATION: Remove from exposure. Keep warm and at rest and provide fresh air. Dust in throat and nasal passages should clear spontaneously. Get medical attention if irritation persists.

NOTESTOPHYSICIANSORFIRSTAIDPROVIDERS: No further information available.
SECTION 5: Firefighting measures

FLAMMABLE LIMITS IN AIR, UPPER: Not Flammable (%BYVOLUME) LOWER: Not Flammable

FLASHPOINT: No Data Available
F: N/A
C: N/A

METHOD USED:

AUTOGTNIOTENTEMPERATURE: No Data Available
F: N/A
C: N/A

EXTINGUISHING MEDIA:
Suitable: Water, alcohol-resistant foam, CO2, dry chemical powder
Unsuitable: Water jet

SPECIAL FIRE FIGHTING PROCEDURES:

Wear self-contained breathing apparatus and full protective clothing in case of fire. Avoid breathing fire fumes

UNUSUAL FIRE AND EXPLOSION HAZARDS: Not explosive

HAZARDOUS DECOMPOSITION PRODUCTS:

The product is non-combustible and non-explosive and will not facilitate or sustain the combustion of other materials. Development of hazardous combustion gases or fumes are possible in the event of fire.

SECTION 6: Accidental release measures

PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT, AND EMERGENCY PROCEDURES

For non-emergency personnel: Keep unnecessary and unprotected personnel from entering. Wear appropriate personal protective equipment as described in Section 8. Follow the advice for safe handling and use given in Section 7.

For emergency responders: Emergency procedures are not required. However, respiratory protection is needed in situations with high dust levels.

METHODS AND MATERIALS FOR CONTAINMENT AND CLEANUP

Do not empty into drains and sewers. Keep from entering into water and ground water systems. Contain spillage where possible and safe to do so. Inform appropriate authority in case of accidental contamination of watercourses or drains.

Use dry clean-up methods such as vacuum exhaust which do not generate dust formation. Never use compressed air for cleaning. If dust is formed applying a dry-cleaning method, personal protective equipment must be used. Avoid inhalation of product dust and skin contact. Place the spilled material in an appropriate waste disposal container for proper disposal.
SECTION 7: Handling and storage

PRECAUTIONS FOR SAFE HANDLING

Provide adequate ventilation. Provide local exhaust or general room ventilation to minimize dust concentrations. Avoid inhalation and contact with skin, eye and clothing.

CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATABILITIES:

Store in accordance with local regulations. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink.

OTHER PRECAUTIONS:

No further relevant information available.

EXPOSURE GUIDELINES: Attempt to stop spillage without personal risk. Should not be released into the environment. Prevent product from entering drains.

SECTION 8: Exposure controls/personal protection

ENGINEERING CONTROLS:

Contains the following ingredients with occupational exposure limit values:

Crystalline Silica (Quartz): TWA: 0.1 mg/cubic meter (respirable dust)

Nepheline Syenite: TWA(respirable): 5mg/m³

Titanium Dioxide: 15mg/m³(OSHA-PEL)

Kaolin: 2mg/m³(Respirable Fraction)

VENTILATION: Provide adequate ventilation. Provide local exhaust or general room ventilation to minimize dust concentrations. The highest probability of silica exposure occurs during dry cutting. Wet cutting methods are recommended.

RESPIRATORY PROTECTION: Use FFP2 type dust mask

EYE PROTECTION: Use tight fitting safety goggles or safety glasses with side shields where dust is formed. Contact lenses may absorb irritants. Do not wear contact lenses in work areas. Have emergency eyewash station available in area where tiles are cut.

SKIN PROTECTION: Wear dust proof protective gloves, boots, and long-sleeved clothing.

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: None required

WORK HYGIENIC PRACTICES: Do not eat, drink or smoke when working. Wash hands and if necessary shower before breaks and after work to remove adherent product. Avoid contact with eyes and skin. After working with the product, workers should wash or shower and use skin care products. Clean contaminated clothing, footwear etc. thoroughly before re-using them.
SECTION 9. Physical and chemical properties

APPEARANCE: Solid

ODOR: Odorless

PHYSICAL STATE: Solid

pH AS SUPPLIED: No data available pH (Other):

BOILING POINT: No data available

    C: 
SECTION 10: Stability and reactivity

STABILITY: The product is STABLE under normal conditions of storage and use. Contact with incompatible materials should be avoided.

CONDITIONSTO AVOID (STABILITY): Avoid contact with acids (e.g. acetic, hydrofluoric, etc.) Glass is non-flammable. Glass will react with hydrofluoric acid producing a corrosive gas – silicon tetra fluoride.

INCOMPATIBILITY (MATERIAL TO AVOID): Acids (e.g., acetic, hydrofluoric, etc.)

HAZARDOUS DECOMPOSITION OR BY-PRODUCTS: Under normal conditions of storage and use, hazardous decomposition products should not be produced. In a fire, decomposition may produce toxic gases / fumes. Glass sand is not classified as a hazardous material by the criteria of the OSHA Hazard Communication Standard, Title 29, Code of Federal Regulations, Section 1910.1200.

HAZARDOUS POLYMERIZATION: Not applicable

CONDITIONS TO AVOID (POLYMERIZATION): Not applicable

SECTION 11: Toxicological information

TOXICOLOGICAL INFORMATION:

Acute: Working with broken or cut tile produces a potential for cuts to the hands and exposed body parts. Acute effects such as eye irritation may occur if associated with high dust operations such as dry cutting tile or during the removal of tile surfaces.

Chronic: Not applicable for intact tiles. Excessive exposure to tile dust can cause discomfort and mechanical irritation. Long term exposure to silica dusts can lead to silicosis.

Crystalline Silica (Quartz)
LD50 Rat oral > 22,500 mg / kg & LD50 Mouse oral > 15,000 mg / kg LC50<br>Carp > 10,000 mg / l (per 72 hrs.)

Nepheline Syenite
Dermal: LD50 estimated to be > 5,000 mg/kg
Ingestion: LD50 estimated to be 2,000 - 5,000 mg/kg

Titanium Dioxide
Oral LD50>10000mg/kg

Skin & Eye corrosion / irritation
Inhalation and potential eye exposure to eyes may cause irritation if contact is made with broken, and / or during procedures involving the cutting of tiles, and / or for operations involving the removal of installed tiles.

Sensitization Existing lung disease may be aggravated after exposure to tile dusts. Long term exposure to silica dusts can lead to silicosis.

Genetic Toxicity No data available Repeated Dose Toxicity No data available

Carcinogenicity
Respirable crystalline silica is classified by the International Agency for Research on Cancer (IARC) as a Group 1 Carcinogen(carcinogenic to humans). The National Toxicology Program (9thReport) lists respirable crystalline silica as known to be a Human Carcinogen. USDOL/OSHA and NIOSH have recommended that crystalline silica be considered a potential occupational carcinogen.

Reproductive Toxicity No data
available Specific target organ Toxicity:

No data
SECTION 12: Ecological information

No information available.

SECTION 13: Disposal considerations

WASTE DISPOSAL METHOD:

Waste Treatment Methods: Can be deposited in landfills, sent to an incineration or other appropriate means of disposal provided they meet the requirements of local laws.

Methods of Disposal: Although nonhazardous, the generation of waste should be avoided or minimized wherever possible. Do not dispose in storm or sanitary sewers. Dispose of in accordance with state and local regulations.

Contaminated Packaging: This material and its package must be disposed of in a safe way.

SECTION 14: Transport information

RCRA HAZARDCLASS: Not Applicable

SPECIAL SHIPPING INFORMATION: Not Applicable

In Accordance with DOT: Not regulated for transport
In Accordance with IMDG: Not regulated for transport
In Accordance with IATA: Not regulated for transport

This product and/or its components have been previously introduced into U.S. commerce and is listed in the Toxic Substances Control Act (TSCA) Inventory of Chemicals in Commerce. Hence, it is subject to all applicable provisions and restrictions under TSCA 40 CFR Section 721 and 723.250.

Thistilecontains < 1 percent by weight each of the following elements, which are SARA313 Recordable: Antimony, Arsenic, Barium, Beryllium, Cadmium, Cobalt, Chromium, Copper, Manganese, Mercury, Nickel, Lead, Silver, Thallium, Tin, Titanium, Vanadium, and Zinc.

Title22 Division2, California Code of Regulations Chapter 3 (Proposition 65): This product contains a chemical or chemicals known to the State of California to cause cancer and/or birth defects or other reproductive harm.

This product or its components meets the following hazard definition(s) as defined by the Occupational Safety and Health Hazard Communication Standard (29 CFR Section 1910.1200):

- Combustible Liquid
- Compressed Gas
- Flammable Aerosol
- Explosive
- Oxidizer
- Pyrophoric
- Flammable Gas
- Health Hazard (Sections 3 & 11)
- Unstable
- Flammable Liquid
- Organic Peroxide
- Water Reactive
- Flammable Solid

Based on information presently available, this product does not meet any of the hazard definitions of 29 CFR Section 1910.1200.

Note: The information in this data sheet provides information related to the potential hazards associated with dusts which may be produced during cutting or otherwise changing the shape of the tile during installation and/or removal.
