PietraArt Travertine from Florida Tile is a stunning collection of natural stone that stands the test of time while adding sophistication and value to indoor and outdoor spaces alike.

Travertine has long been a symbol of luxury and opulence. The Ancient Romans utilized it when building the Colosseum in Rome and today the travertine piers and arcades are largely intact and serve as a testament to the inherent strength and lasting beauty of this amazing stone. In the modern era, the Getty Center was built with 1.2 million square feet of travertine to complement the natural environment and give homage to historical building concepts, resulting in an impressively beautiful mecca of art and architecture.

Three distinct stone choices create value in any residential or commercial project. Ivory is a subtle blend of creams and beiges with hints of soft gray that adds an understated elegance. Picasso is a complex mix of bold ambers, tans, whites and just a

touch of contrasting gray that brings warmth and depth to any space. Silver Ash is a muted composite of neutral silver and gray tones that creates a sense of calm.

This exquisite natural stone collection is a versatile design tool. Each type of stone comes in varying size, format, and finish options. All three feature 3x6 and 4x4 field tiles in a tumbled finish as well as 12x12 and 18x18 formats in a filled & honed finish. Field tile in 8x8, 8x16, 16x16, and 16x24 sizes with a chiseled edge are available in Ivory and Picasso. Mosaics, including a random stack and 2x4 brick pattern - both in a tumbled finish, are choices in all three stones. A chair rail and pencil in the filled & honed finish complete this line.

PietraArt Travertine is able to easily tolerate extreme weather fluctuations making it well suited for both outdoor and indoor installations. Its proven durability in high-traffic environments makes it a perfect fit for both residential and commercial projects.

note: Inspect all tiles before installation. Natural stone products inherently lack uniformity and are subject to variation in color, shade, finish, etc. It is recommended to blend tiles from different boxes when installing. Natural stones may be characterized by dry seams and pits that are often filled. The filling can work its way out and it may be necessary to refill these voids as part of a normal maintenance procedure. All natural stone products should be sealed with a penetrating sealer.

Color, texture, and finish variations may occur due to the nature of the product.

Color reproductions in this printed piece may vary from actual tile colors. Final selection should be made from actual tile samples.

Field Tile Nominal Size (in) <sup>1</sup>	Metric (cm)	Pcs./Sq Ft <sup>2</sup>	Thickness <sup>3</sup>
<b>3x6</b>	9.5x30	3.26	10mm
<b>4x4</b>	30x60	.5	10mm
<b>8x8</b>	60x60	.25	11mm
<b>8x16</b>	60x122	.129	12mm
<b>12x12</b>	58x58	.38	10mm
<b>16x16</b>	58x58	.38	13mm
<b>16x24</b>	58x58	.38	12mm
<b>18x18</b>	58x58	.38	12mm

<sup>1</sup> These values may vary from lot to lot.

<sup>2</sup> These values are based on actual sizes including the grout joint.

<sup>3</sup> May not apply to textured surfaces or tiles with uneven back patterns such as mesh mounted mosaics.
